

Errata List “Expert Hold’em – Rolf Slotboom’s Winning plays” DVD’s

Just as with my books, I have gone through the effort of listing any errors & mistakes that are part of my DVD’s, in order to provide you guys with the best information possible. If you notice anything that you don’t agree with, things that seems strange or that you analyze to be flat out wrong, just send over your comments to me through mail. If it turns out you are correct, I will include your comments in this Errata List.

Disc 1:

Optimal preflop strategies

- 10:30 In the situation of the AK with a \$1,400 stack, it is said that the money is “very deep”, while in fact the money is just *fairly* deep.
- 26:40 If you get called, “then you know you’re in bad shape” should be “then you know that you are probably not a favorite”.

Disc 2:

Dynamics of big-bet play

- 10:00 The example mentioned is said to be about the number of big *bets*, but it should be the number of big *blinds*.
- 15:30 In this example, we have JT on a J85 flop and are up against AJ. This AJ should have been either QQ, KK or AA, for an overpair rather than top pair / top kicker.

Disc 3:

Play on the later streets

-- --

Disc 4:

Dynamics of limit play

-- --
